BEFORE BEGINNING: SET UP AND CONFIRMATION CHECKLISTS

For a smooth start to FMH Precision Solutions, we recommend confirming the following setups so data can be transmitted seamlessly, and ensuring you have some key conversations so everyone involved is prepared.

Pre-Planting Check List:

- Farmer has all fields set up per FMH Standards
- Agency has all Farms/Fields set up per FMH Mapping Procedures
- Farmer/Agent/Data Manager all agree precision data will be utilized
- FMH is notified customer will be processing policy via Precision Solutions

Pre-Harvest Check List:

- Farmer has identified proper calibration procedures for their operation
- Farmer/Agent/Data Manager are educated on proper calibration requirements
- FMH is notified customer is processing production data via Precision Solutions
