

CROP PRODUCTION REPORTING

WHAT AGENTS NEED TO KNOW

The deadline to report production for 2021 planted acreage insured under CCIP plans is 45 days after the Cancellation Date. For producers with spring-planted crops that have a March 15 Cancellation Date, the **Production Reporting deadline is April 29, 2022.**

To find policies that need updated, agents can run their Missing APH Information report in FMHA. The PRD is also the deadline for other potential items that may need updated. Use this handy reminder list to make sure your policies are current.

PRODUCTION REPORTING REMINDERS

> ADJUST ACTUAL PRODUCTION HISTORY

APH corrections can be made for any prior years. For APH corrections made beyond three years, verifiable records are required to be uploaded to ensure accuracy.

> REPORT ADDED LAND WITH RECORDS

Be sure to include policyholders that want to use another producer's records.

> COMPLETE DETERMINED YIELD REQUESTS

Examples include variable T-yield exceptions for policyholders who haven't produced a crop in the last 10 years or policyholders who now farm on entirely different land in a county in which they don't qualify as a New Producer.

> EXCLUDE CROP YEARS FROM THE YIELD EXCLUSION (YE) OPTION

While the YE option is added at the crop level, a policyholder may choose to exclude the YE option at the crop year level within each database if it benefits their approved yield to keep it. If no changes are made from the prior year, the policyholder can check the Yield Exclusion Opt-Out box on the Combo (APH/ Production) Report.

> DELAYED HARVEST APH IMPACTS

If an insured is unable to finish harvest (due to an insurable cause), it is a delayed claim, or records are unavailable from the processor or marketing outlets by the PRD, a temporary yield type of "J" may be used. This temporary yield will be equal to the prior year's approved APH yield.

> QUALITY LOSS OPTION

Report Pre-Quality Production and supply required documentation to use the Quality Loss Option in APH if QL is elected at the Sales Closing Date.
