

HOW TO EXPORT DATA FROM A TRIMBLE EZ GUIDE 250

Step 1 – Connect the USB drive.

Step 1 – Select the following:

Configuration / Data Management / Manage Fields / Get Fields from USB

Step 3 – Do one of the following:

1. Select the specific client, farm, and field to import, OR
 2. Select ALL to get all of the data in a category to the USB drive.
- Note, if you select ALL, you do not need to select the later options.*

Step 4 – Select **Import Files** and then press **OK** - a warning message appears.

Step 5 – Press **OK** to continue. A screen with an hourglass appears.

Your files are now imported from the USB drive.
